

SaaS Scale Readiness Checklist ■

- **Cost Visibility:** Do you know exactly what each line item on your cloud bill maps to?
- **Tagging & Ownership:** Are resources tagged by team/feature so you know who owns what?
- **Elastic Infrastructure:** Can your system scale up and down automatically?
- **Monitoring & Alerts:** Will you know if costs or traffic double overnight?
- **Finance Alignment:** Is cloud spend included in your runway and forecasts?
- **Failover Planning:** Do you have backups or redundancy for traffic spikes?
- **Security & Access:** Are permissions tight, with least-privilege access?
- **Documentation:** Could a new teammate understand your infra in a week?
